

LACO TECHNOLOGIES

HELIUM SNIFFER PROBES

LACO's line of Helium Sniffer Probes are the ideal accessory designed for use with popular helium mass spectrometer leak detectors. The various models are easily connected to your leak detector's sniffer or inlet port. Connect LACO's helium sniffer probe, then your leak detector is ready for sniff leak testing. An external calibrated leak test helps ensure accurate measurements.

SPECIFICATIONS

- Achieves sensitivities to 1×10^{-7} atm-cc/sec.
- Male connector for Quick Connect/Disconnect (QCDC).
- A series - Stäubli-quick disconnect. Compatible with all Titan Versa/Alcatel Leak Detectors including ASM 142, ASM 180T, ASM 182T and ASM340.
- N series - Rectus quick disconnect. Compatible with LACO's TitanTest™, Inficon's Modul 1000, LDS3000, UL1000 Fab, and UL5000 Leak Detectors.
- HS-115 series - Compatible with Varian-brand leak detectors.
- HS-NW series - compatible with leak detectors using NW fittings at inlet port, such as Oerlikon/Leybold Phoenix L300i, L300i DRY, L300i Modul, L320i Fab, L340i, L500i, and TitanTest.
- Designed for gross mode inlet pressures at 0.1 Torr and above.
- Includes spare filter tip assembly.
- Hose extensions also available.
